Mr. Cage appeared by phone: He thanked the Board for the opportunity to appear via telephone, and thanked the executive director for her information and communication thus far, noting that he was able to reach her easily and she responded quickly to his emails. He stated the program is to gather information

on licensure reciprocity and data collection. He stated that Governor Sandoval has proclaimed this the Year of the Veteran. He stated they are seeking federal funding to aide in licensure reciprocity. The study is to gather information as to barriers and opportunities to enter into the field, and to reduce those barriers based on the experience of the applicant, not to reduce the quality of the applicant. The Executive Director noted that the Board created an endorsement process specifically for veterans, and it provides for a 50% reduction of the application fee, requires fewer references, provides that the Board conducts the license verifications, and only requires the physical therapy transcript, not the undergraduate transcripts. It was noted that this process reduces the time and expense to the veteran applicants. It was created in response to the Governor's Proclamation in 2013 to assist veterans in licensure.

Second: Baum.

The applicant stated that he reviewed the Board meeting minutes and noted that the appropriate length for the probation should be 3-6 months. The executive director noted that the minutes do not reflect the graduation date or work experiences of the applicants, and therefore he cannot base his probationary term off of that. She noted that the term is based on what other applicants have been issued, and based on when graduated, how long practiced, any absence from practice, practice time in the US, etc. The applicant argued that the appropriate term should be 3-6 months. Chairman Puentedura noted that the motion and second had been made and the applicant is free to decline the offer and not work in Nevada.

Richard Dreitzer noted that the legal bills were high, and noted that the Dunning matter is taking up a lot of his time. Item 25- Review and approval of Executive Director's Report as of July 7, 2014. The report was not prepared in time for the meeting due to renewal period.

Item 26- Review and discussion of The Nevada TeleHealth Advancement of Act of 2015. Board member Menicucci noted that schools engage in telepractice, as the therapist is available by phone with the PTA present with the patient. It was noted that abuse issues could be huge, and not always approved for billing. It was noted the FSBPT has been discussing this and the Board will likely follow what is happening nationally. The director was directed to report to Paula Berkley, the Board's lobbyist, that the Board will not make any recommendations to the proposed legislation at this time, but will monitor.

Item 27- Update of activities of Board office.

The director noted that the renewal process was going well; there has been a significant increase in the number of continuing education course submissions which has the office busy; the annual financial audit is due December 1 and the director has contacted the auditor for a proposal; there are a lot of cases pending, one of them with over 1100 patients; the state is implementing new reporting of licensees; the fingerprinting fee increased by \$2.50, and without a lot of heads-up, so a few applicants were delayed in processing; the fixed dated testing continues to be challenging as staff cannot call all applicants with their results in one day. The director thanked the Board members for recognizing her 15 years with the Board. The director noted that Muriel Morin-Mendes was doing an incredible job at juggling all of the new applicants and continuing education courses.

Item 28- Review of files/ratification for licensure.
