PHYSICAL THERAPY BOARD

3291 North Buffalo Drive, Suite 100
Las Vegas, NV 89129

ADVISORY COMMITTEE ON CONTINUING COMPETENCE MEETING MINUTES JUNE 4, 2021

Item 1 - Call to order / Roll call for Confirmation of Quorum.

The meeting was called to order at 9:01 am. Committee Members present: Gina Tulimero, Tiffany Barrett, Chair, Jennifer Nash, Krysta Boyd, Jennifer Luthy, Vice Chair

Staff present: Charles Harvey, Executive Director, Chelsea Wilson, Administrative Assistant, April Ramirez, Board Operations Support Specialist

Public Members present: Kimberly Prucha

Item 2 - Public Comments

Kimberly Prucha, Fulcrum Institute – I provided comments on the letter that has been forwarded to the Advisory Committee requesting an appeal of courses that were denied in the last meeting. I hope that the documentation for the Cranial 1 Mobilization courses will be reconsidered. One of the key points as to why the courses were denied was that scientific evidence has clearly invalidated the topic, and that's not the case. There are differing pieces but it has not completely and clearly invalidated cranial as an effective technique for work. That is seen not only in some examples within the letter that I wrote, but also in 2.5 reference pages that were submitted with the application back in April. I'm hoping that the Board will reconsider this course and approve it. I guess one of the questions that I have is, if the course is allowed to take place and we are allowed to use this work, then I guess we will just need a better understanding as to why it can't be

given CEU approval, and have all therapists across the spectrum of which we practice be supported within the State of Nevada.

Item 3 - Welcome New ACCC Committee Member Gina Tulimero

Member Tulimero introduced herself and provided a short bio.

Item 4 - Staff Update and Discussion on Possible Approval of Additional ACCC Meeting Dates **(For Possible Action)**

Staff discussed changes to the course application review process and advised the Advisory Committee that the bulk of applications are received between May and July, which accounts for the large number of courses being reviewed today. Due to the volume of course application submissions, an additional meeting may be needed. Staff will coordinate the next meeting date.

Item 5 - Review, Discuss, Amend and Approve ACCC Meeting Minutes **(For Possible Action)**.

A. April 2, 2020

Motion: Motion to approve April 2nd minutes: Jennifer Luthy

Second: Krysta Boyd

Motion Passes Unanimously

Item 6 - Request for Approval of Face to Face Continuing Education provided by the American College of Healthcare Executives.

Chair Barrett - The Board received a letter from Sheri Silverman asking for approval of courses from the American College of Healthcare Executives, however, there were no courses attached for review. The ACCC can not give blanket approval for one provider. Request that staff notify the requestor and inform her that for courses to be approved they have to submit through the formal process for review and discussion.

Item 7 - Course Appeal Requests. (For Possible Action).

A. Genesis Healthcare

Chair Barrett - The ACCC requested a quiz from this provider at the last meeting. The provider did not attach a quiz with their appeal request, so why is this being reviewed by the ACCC. Member Nash stated that there seemed to be a misunderstanding from the provider between virtual and live, so the provider did not feel that they needed a post-test. Chelsea Wilson relayed her conversation with the applicant, who mentioned that there was no specific

clarification between how they were categorizing their course, and the ACCC White Paper. The provider felt that the Committee's decision was unfair, and requested an appeal, therefore it was brought back before the ACCC for further discussion and clarification. Chair Barrett stated that even if the course is live like a webinar, there is no way to ensure that the person on the other end actually participates and pays attention. This is why we have always asked for a quiz. If the course is not in person, regardless of it being virtual, it needs to have a post-test.

Motion: Motion to deny the request for approval without conditions, for the course for Genesis Healthcare: Jennifer Nash

Second: Gina Tulimero

Motion Passes Unanimously

Genesis Healthcare will be notified that their request for appeal is denied, however, the Advisory Committee's original request to add a quiz still applies. If they want to make a quiz and send it in, it will be reviewed.

B. Fulcrum Institute

Chair Barrett - An appeal letter was provided by Kimberly Fulcrum, the public member who also gave public comment regarding the course on cranial physical therapy. Chair Barrett asked for the Committee's thoughts based upon the appeal letter and the ACCC's original position to deny the course based on the White Paper denial code C1G, which covers a valid practice that is not accepted by contemporary practicing physical therapist, and also denial code C1, about issues related to an area of clinical practice which the scientific evidence has clearly invalidated the topic.

Member Nash – I'd just like to mention that I've looked in our textbooks and don't see the technique. Is there any published peer review research that they were able to provide to you, demonstrating the actual movement or efficacy of this treatment?

Chair Barrett – There was some evidence provided last time from Kimberly, and that evidence was not strong enough to support what the course was actually teaching. So there wasn't any evidence that was strong enough to support it. I do want to make a note about one thing that was stated in the letter regarding the specialist certification exam for neurologic physical therapy. When I responded to Kimberly and stated that there wasn't craniosacral included in the exam, I wasn't saying that we need to teach to the exam. I was just using that as an example for the fact that it wasn't a technique that is done by contemporarily practicing physical

therapy because if it was, then it would be something that is included in the neurologic specialty for physical therapy, and it's not currently included in that. So I wasn't saying that they needed to take it, I was just using that as an example of the fact that this is something that physical therapists in the neurologic realm use.

Member Nash – I understood it that way as well. As a neurological clinical specialist, I am not familiar with the technique. I have never utilized the technique, I should say, and without current evidence demonstrating the efficacy and the need that physical therapists should have to learn this information, I still stand with my original thoughts.

Member Luthy - I'm not a neuro specialist, so I'm not all that familiar with the practice itself. However, I am a big proponent of current research and I feel that if we don't have substantial research to support the teachings that they are providing, then I would agree to stand by our initial denial.

Member Boyd – I'm glad you clarified the example that you used about it not being something that is needed for studying and taking the NPCS. I'm not NCS. If there were current ongoing research that supports it then I would support it, but at this time I have not changed my mind on the position either.

Motion: Motion to stand with our original decision regarding Item #7B: Jennifer Nash

Second: Jennifer Luthy

Motion Passes Unanimously

Item 8 - Review and Discussion on Board Meeting Actions

A. Jen Nash, Board Liaison

Member Nash briefed the Advisory Committee on Board discussions regarding course application denials, Revisions to NAC 640, and cultural awareness and diversity training. Advisory Committee members discussed double-checking the reasons for course denial to make sure the meeting minutes are reflected accurately. The Advisory Committee discussed the number of individuals on the Advisory Committee and the background and experiences of the members. The Advisory Committee discussed opportunities to increase the diversity of professionals in physical therapy and adoption of additional cultural awareness training, and whether there should be an annual requirement for license renewal, or it should be a recommendation.

Item 9 - Review and Recommendation of Continuing Competency Courses (For Possible Action).

Meeting Recessed at: 12:10 pm

Meeting Reconvened at: 12:15 pm

Chair Barrett left the meeting at 1:10 pm. Vice Chair Luthy asked for motions.

Motion: Motion to approve all courses discussed and deny courses identified with the specific comments that were given, until 7/31/2022.

Second: Krysta Boyd

Motion Passes Unanimously

Courses Approved:

| | Provider | Course |
|----|-------------------------------|---|
| 1 | FYZICAL, LLC | Benign Paroxysmal Positional Vertigo Foundations Course for Physical Therapy |
| 2 | Apply EBP, LLC | The Well Equipped Therapist! Apply EBP School Based OT and PT Symposium 2 interventions across the Lefespan |
